

The Software Testing Experts

Where will you go after the Foundation level....?

The Benefits of a Career Path

What's in it for me?

- An internationally recognised qualification
- The ability to do the job in a more professional manner to acknowledged standards
- Career prospects & rewards

What's in it for my employer?

- More effective & efficient skilled workforce, delivering “cost effective testing”
- Consistent testing approach & language world wide

What will the ISTQB/ISEB Foundation Course Provide?

The ISEB Foundation Certificate in Software Testing is based on the ISTQB syllabus. Once you have passed the exam you will have the pre-requisites to progress to the following courses:

- ISTQB Advanced Test Manager
- ISTQB Advanced Test Analyst
- ISTQB Advanced Technical Test Analyst
- Certified Agile Tester – although the ISTQB/ISEB Foundation course is not mandatory for this course it is recommended that you have this level of understanding

All of the ISTQB Advanced courses are five day tutor led classroom courses plus a revision and exam preparation day, followed by the exam on a separate date. The courses are presented using a mixture of slide presentations, discussions, tool demonstrations and practical exercises. The qualifications are assessed by means of a three hour multiple choice-style examination.

The Advanced level qualifications are aimed at those individuals who have achieved an advanced point in their software testing careers. Each exam handles a different aspect of software testing and builds on the Foundation and Intermediate certifications with more practical and specific application of the broader theory.

ISTQB Advanced Test Manager

This course is suitable for those who are expecting to be actively involved in the management of any aspect of software testing.

Learning objectives of Test Manager include:

- Define the overall testing goals and strategies for the systems being testing
- Plan, schedule, and track tasks
- Describe and organize the necessary activities
- Select, acquire, and assign adequate resources
- Select, organize, and lead testing teams
- Organize the communication between members of the test team, and other parties
- Justify decisions and provide adequate reporting

The ISTQB Advanced Test Manager is the only pre-requisite for the Expert level that is being compiled.

The Software Testing Experts

Where will you go after the Foundation level....?

ISTQB Advanced Test Analyst

The Advanced Test Analyst course is suitable for those actively involved in the analysis, specification, design and execution aspects of software testing.

Learning objectives of Test Analyst include:

- Structure the tasks defined in the test strategy in terms of business domain requirements
- Analyse the system in sufficient detail to meet the user quality expectations
- Evaluate the system requirements to determine domain validity
- Prepare and execute the adequate activities, and report on their progress
- Provide the necessary evidence to support evaluations
- Implement the necessary tools and techniques to achieve the defined goals

ISTQB Advanced Technical Test Analyst

This advanced level qualification for technical test analysts is aimed at all testing professionals wish to gain greater knowledge and recognition of technical test analysis and its application: Testers, Test Analysts, Test Engineers, Test Consultants, Test Managers, User Acceptance Testers and Software Developers.

This course provides specialist coverage of the technical aspects of software testing, such as testing quality characteristics and performing white box testing.

Learning objectives of Technical Test Analyst include:

- Structure the tasks defined in the test strategy in terms of technical requirements
- Analyse the internal structure of the system in sufficient detail to meet the expected quality level
- Evaluate the system in terms of technical quality attributes such as performance, security, etc.
- Prepare and execute the adequate activities, and report on their progress
- Conduct technical testing activities
- Provide the necessary evidence to support evaluations
- Implement the necessary tools and techniques to achieve the defined goals

How will I Choose the Course that is Right for Me?

- Download a presentation from one of our trainers 'Making a choice about your career path' <http://testing-solutions.com/resources/presentations>
